

Science & Business: Are you interested in both?

You might want to consider a

Bachelor's of Science Degree (BS) in Genetics & Cell Biology

PLUS a Master's Degree (PSM) in Molecular Biosciences

in just 5 years!

Here's the formula:

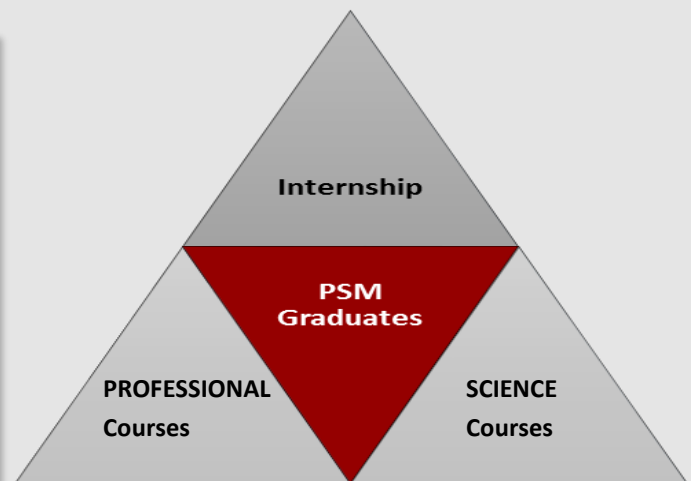

$$\begin{array}{rclcl} \text{BS Genetics \& Cell Biology} & + & \text{PSM in Molecular Biosciences} & = & \text{BS (GenCB) + PSM Degree} \\ 3.5 \text{ years} & + & 1.5 \text{ years} & & = 5 \text{ years} \end{array}$$

What is a PSM in Molecular Biosciences?

- ◆ Master's degree that combines science with professional courses in ethics, business, management and communication.
- ◆ Designed to help students transition into the workplace by providing training in skills that employers want.
- ◆ Requires a workplace internship.
- ◆ The PSM degree can be earned completely online or in a hybrid format.

Benefits of the 5-year BS+PSM Program:

- ◆ You earn two degrees in a timely and cost efficient manner.
- ◆ You will have a PSM graduate degree: one of the fastest growing degrees in the country. (www.sciencemasters.com)
- ◆ You develop relationships with faculty from different colleges.
- ◆ Gain experience in a workplace internship.
- ◆ You will easily transition into the workplace because you will have both professional and science skills.
